LOAD RANGE	25-35 lbs. 11-16 kg.
INCLUDED	Raincover
ADD-ON	Reservoir 3L

CARRY

SPACERMESH HARNESS

LIGHTWIRE SUSPENSION

AIRSCAPE® BACKPANEL

SPACERMESH HIPBELT

LIGHTWIRE SUSPENSION

- + 4mm LightWire peripheral frame effectively transfers the load from harness to hipbelt
- + Atilon framesheet spreads load across the entire backpanel to the peripheral frame

ADJUSTABLE TORSO LENGTH

- + Fit is fine-tuned using easily accessed adjustable web system
- + Floating yoke design ensures consistent fit comfort at any setting

AIRSCAPE BACKPANEL

- + Mesh-covered ridged foam allows maximum ventilation while keeping the load close to the body

SPACEMESH HARNESS AND HIPBELT

- + Soft edgeless padded mesh offers a soft breathable contact surface and comfortable load support
- + Adjustable sternum strap with rescue whistle

SIZING / FIT

VOLT – MEN’S SIZING

O/S 18-22" / 46-56 cm

VIVA - WOMEN'S SIZING

O/S 15-19" / 38-48 cm

WOMEN'S SPECIFIC FIT

- + Shorter torso length
- + Narrower, shorter harness with curves designed to accommodate most women's necks, shoulders and chests
- + A hipbelt designed to wrap naturally around the curves of a woman's hips, offering better load stabilization and support

SIZING / FIT

HARNESS FIT

1 POSITION THE PACK

Completely loosen the pack's hipbelt, harness and load-lifter straps.
Load the pack with 10-20 lbs./ 4-9 kg. of gear.
Put the pack on and make sure the hipbelt is centered and rests over the hipbone.
The hipbelt padding should sit halfway above/below the hipbone.

2 BUCKLE HIPBELT

Buckle and tighten the hipbelt evenly using Osprey's cross-body ErgoPull.
The padding of the hipbelt should wrap around the hips with approximately 1-3 in./2.5-6 cm. of webbing between the buckle and the hipbelt when tightened.

3 TIGHTEN HARNESS

Tighten the shoulder harness straps to tension by pulling them down and back.

4 TIGHTEN LOAD LIFTERS

Tightening the load lifters will pull the pack close to the body and help stabilize the load.

5 ADJUST HARNESS

The harness straps should wrap fully around the shoulders with no gaps between the pack and back.

The padded part of the harness straps should end 1-2" / 2.5-5 cm below the armpit.
And the harness should have 1-2" / 2.5-5 cm of webbing remaining.

6 STERNUM STRAP

Adjust the sternum strap to approximately 2"/5 cm below the collarbone; buckle and tighten to tension

ADJUSTABLE HARNESS (TORSO LENGTH)

1. Identify the two strap buckles, located behind where the padded hipbelt wings meets the pack.
2. Tighten the torso adjustment straps that pass through these buckles to shorten the torso length of the harness or loosen the straps to extend the torso length.
3. Adjust so that the hipbelt is centered and rests over the hipbone while the harness yoke, where the harness straps come together near the base of the user's neck, is 1-2" / 2.5-5 cm below the C7 vertebra—the large protruding bone at the base of the neck.

FEATURES

CORD LOOPS ATTACHMENT POINTS
45L / 65L

Front panel cord loops for rigging gear to pack or attaching an Osprey Daylite®.

DUAL UPPER AND LOWER SIDE COMPRESSION STRAPS
45L / 65L

Upper and lower compression straps provide added stability when the pack is not full or offer additional attachment points for carrying gear on the outside of the pack.

DUAL MESH SIDE POCKETS
45L / 65L

FLOATING TOPLID WITH POCKET
65L

SLEEPING BAG COMPARTMENT
65L

Lower zippered compartment for dedicated sleeping bag storage with detachable divider for unimpeded access to pack interior.

SLEEPING PAD STRAPS
45L / 65L

Removable sleeping pad straps allow for quick, secure external gear attachment

ZIPPERED HIPBELT POCKETS
45L / 65L

FEATURES

RESERVOIR SLEEVE

45L / 65L

The dedicated internal hydration sleeve keeps the reservoir close to back, which provides proper weight distribution when carrying the pack.

- + The loop with buckle ensures proper vertical orientation and stability
- + Elasticized routing straps on right or left side of the pack's harness hold the reservoir hose in place
- + The backpanel hydration exit port is centered allowing routing to the right or left side of the harness
- + Compatible with any reservoir up to 3L

DUAL ICE TOOL/TREKKING POLE ATTACHMENT

45L / 65L

The ice tool loops and upper compression straps provide secure tool attachment.

1. Slide the tool shaft through the top of the ice tool loop and flip the shaft up toward the top of the pack.
2. Unclip the upper compression strap and wrap it around the tool handle before re-clipping.
3. Tighten the compression strap to prevent the tool/pole from shifting.
4. Reverse to remove.
