### How to use:

1. Turn on the projector by pressing the power button on the remote or on the projector. If you connect it using the USB connection, you'll get the screen where you can choose the mode.
2. Press the Source button or press Input on the remote, and select the desired input source.
3. Place the projector on a stable surface and focus the image. Turn the focus knob until the image is clear.
4. Adjust the volume using the buttons on the projector or the remote
